BULLET RESISTANT WINDOW

Bullet resistant vision windows are manufactured using a high grade stainless steel frame for attractive appearance and optimum endurance in all climates. UL Rated Level 1 glass is standard with Level 2, insulated or tinted glass optional. The frame design reduces installation time by as much as 50% and is aesthetically balanced with other drive-up equipment. Sizes available include: 3'x5', 3'x6', 3'x8', 3'x10', 3'x12' and 3'x15'.

Commercial grade window shades are also available with chain driven roller type mechanisms that are easy to operate.
