

Branch Refresh Programs

Do your branches need a drive up makeover? We provide cost effective solutions to enhance your drive-up and create the appearance and functionality that you want to show your customers.

Drive up Signage

Install our **outdoor LED bank drive thru signs** and make it easy for your customers to find the OPEN lane and conduct their business. Our lighted signs are used to indicate whether a drive through lane is open or closed, the location of the ATM drive up, as well as the location of other specialized drive thru banking lanes such as *Commercial*, *Night Deposit* and *Truck Lane*.

LED Lighted signs are a cost effective way to enhance your lanes. LED Signs are 50% brighter, 90% more energy efficient and guaranteed viewable in direct sunlight. It costs less than \$5 a year to operate a new LED Open|Closed sign!

Add Low Clearance and DO NOT ENTER signage to the drive thru canopy to alert customers to clearance height restrictions and lane traffic flow.

Video and Audio Upgrades

The Adding 2-way communication to older model drive-up systems is easy with the AV-1523. The tough, self contained PVC housing provides color LCD display, color camera with motorized tilt capabilities and built in heater to extend operational temperature. The small footprint provides flexibility for a wide range of installation applications.

Use your Drive-up Audio Video System as a Marketing Tool

Your new audio and video equipment adds a human touch to remote banking communications. You can enhance that communication even more by extending your marketing messages via full function audio video platforms. Our equipment can display multi-media messages to your customers while they are in the drive-up during a transaction.

Branch Refresh Programs

Bollard Covers and Curb Painting

There is no need to replace or re-paint your bollards. Our bollard sleeves keep your drive up looking new while protecting your equipment. Bollard sleeves and covers increase the visibility of your bumper posts and bollards as well as enhance the aesthetics of the surrounding area while providing protection from the elements. Our high-grade plastic bollard sleeves/covers are made in the USA and made using ultraviolet and antistatic additives to make them temperature and fade resistant. We offer multiple colors in various sizes to choose from to fit various surroundings.

Curb painting is another effective way to keep your drive up lanes looking new as well as clearly defining travel paths.

Drive In Mirrors/Queue Line Video

Your customers have expectations when they use your drive-in. They expect quality products and services, but they also expect that their time at your site will be spent efficiently. They expect fairness. And they hope that you are prepared to deal with them and have the necessary background information to serve them quickly. Our drive-in queue line management aids will help you manage your customer's experience. We provide Drive in mirrors and queue line cameras that interact with your one or two way video system that will let you know how many customers are waiting in line. We also provide sensors that let you know when a vehicle pulls up to your drive up and needs service.

Window Shades

There are many reasons to have window shades on your drive-up windows. Our shades will improve security and let your customers know that you are closed. They can be just say closed, blank, or customized with your message.

Branch Refresh Programs

Replacement Carriers

We provide replacement carriers for all drive-up systems. We have units in multiple colors to help with multiple lane coordination.

Equipment Appearance

There is no second chance to make a good first impression. Drive-up lanes are dirty, busy places and the equipment soon gets dirty and banged around. We can refurbish or clean your ATMs, kiosks, depositories, and pneumatic systems to keep them in a condition that helps make transactions pleasant for your customers. Our cost effective programs range from a one-time refurbishment to cleaning schedules. Services include:

- Cleaning of equipment
- Painting of equipment
- Repair damaged equipment
- Pressure washing
- Compliance notices/signs
- Logo panels checked and or replaced
- Trash removal
- Graffiti removal
- Oil stain removal
- Detailed reporting on each visit
